**BERLIN** , March 14 , 2022

Mr.Lee Smolin,  
Physicist (and ,Philosopher?),  
Waterloo, Canada

„2022 CLOSER TO TRUTH“  
*L. Smolin 2022 (Internet)*

(More precisely: „Nearer To Complete Idiocy“)

Dear Mr.Smolin, dear Friend:

„There is nothing special about me. All of us are made of particles that have been guided to the present by a wave function on our vast space of possible configurations. The wave function surrounds where I am now, but it also has other branches where I might be, but am not. Some of them branch from that experiment and develop the empty history that I did not take, but would have had the atom not decayed. The empty wave function of the particle flows on from there, to this day. This empty branch of my wave function continues to inhabit London.“ (and so forth., **L.Smolin** „Einstein’s Unfinished Revolution“, Waterloo **2019**, p.125)

The first sentence is quite correct: There is nothing special about the author – there are, regrettably, many, **too** many („scientists“) like him. But the sentence is **inaccurate**. Because as the last part of this quotation and the following pages of this book show, the author is apparently a declared Dumbass – in German: „Vollidiot“ [incidentally similar to our vice chancellor, e.g., and his homo’-mafia-party]. – Just some years ago (in 1997) he had written (hypocritically?):

„...but what if, as seems likely, the problem in the end is that we have the wrong theory rather than just the wrong interpretation? If not for the philosophers, who is going to have the courage to tell the physicists when quantum theory, or another of our constructions, just cannot be made sense of? In the past, philosophers like Leibniz did not hesitate to tell physicists when they were speaking nonsense. Why now, when at least as much is at stake, are the philosophers so polite?“ (**L.Smolin 1997**, „The Life of the Cosmos“, p.195)

Since October 2021 there is officially at hand of the Dumbass and his Perimeter Institute, Waterloo, a very detailed critical treatise about this nonsense – in my book of 400 pages, „Calculus Materiae“, I, G.E.Streibig alias Chyron, have shown, even under reference to Leibniz, on which muddled, contradictory, idiotic nonsense his Physical ‚Theories‘ („Loop Quantum Gravity Theory“, etc.) and those of his many colleagues are founded. – The Result: No reaction – Silence – the Idiots carry on like before... So this quotation from 1997: **Nothing but empty words.**

Every good wish.

Sincerely,  
G. E. Streibig alias Chyron
