Mr. Martin Rees
Madingley Road
Cambridge
CB3 0HA

Dear Mr. Rees,

in your book „Just Six Numbers“, London 1999, you want to use the ‚numbers‘ (‚constants‘ ...) ‚N‘, ‚Epsilon‘. ‚Omega‘, ‚Lambda‘, ‚Q‘, and ‚D‘ to describe „the deep forces that shape the universe“. – A really great attempt! – But unfortunately the result is sheer nonsense!

Because there are not „six ‚numbers‘ (‚sizes‘, ‚constants‘...), but exactly 6 Laws (Powers, Vires). And these 6 Laws (Powers, Vires) do not Shape the Universe, but Control and Stabilize it – with all its necessary mobility. Without these 6 Laws (Powers, Vires), the Universe would immediately collapse.

See the enclosed excerpts of my book „Calculus Materiae,“ *The 6 True Laws of the Universe* (p. 288 – 291) – the decent, albeit irrational, infinitesimal, and infinite, Building (Structure); and, especially, on the other hand, Einstein’s stupid Idiocy: „*No curvature because of (through) curvature*“, *The 4 Main Idiocias* (p. 273), – so not the work of a capable Architect, but of a complete Bungler. (Its „expansion“, the „big bang“, the „black holes“, etc. are all the same Einsteinian Nonsense.)

Good luck and every good wish

Sincerely

G. E. Streibig alias Chyron
