BERLIN, Juli 12, 2023

Dear scientists, philosophers, theologians, dear friends,
in order to present to you once again, in broad outline, the system and structure of being as I have described it in my book „Calculus Materiae“, I have presented the science of this system –

THE SCIENCE OF BEING

- summarized in 16 theorems. As you can see, only mathematics can compare with this system, with this science of being, concerning clarity, logic and exactness, - while in contrast to this, for example the (present) physics, which deals with the ‚sub-area‘ „matter“, represents nothing else than a mere stringing together (accumulation) of partly contradictory, therefore nonsensical, statements and assertions, - moreover in each case out of ‚sub-departments‘ standing mostly with each other in no (direct) connection (each ‚department‘ with its own, artificial system of measurement).

But instead of finally admitting this erroneous development openly in front of the public and to take back the nonsense (fake) of such (alleged) phenomena like „black holes“, „big bang“ etc. or at least to question them honestly, every new experimental (sensational) discovery, which has (should have) falsified the underlying theory ‚actually‘ long ago, is declared as discovery of another (such, nonsensical, sensational) phenomenon: Just as the discovery of Schwarzschild has (should have) ‚actually‘ falsified the ART long ago, so every present and future discovery of galaxies outside the ‚13,8 billion light-year zone‘ has immediately falsified the „Big Bang“ - instead of passing off such a discovery as, say, a „discovery of a slowing down of time shortly after the Big Bang“. So let’s see how long the physicists want to fool us.

Every good wish.

Sincerely,
G. E. Streibig alias Chyron
